

BSM-SAFETY POINT

Multifunction Safety Station– Version BSM1 (Buoy & Information Panel)

BSM SAFETY POINT B.IP is composed of an upper box containing the new generation lifebuoy SILZIG® and of an information panel below
The information printed on the panel precise exactly the location of the BSM Safety Point. Emergency telephone numbers can be also displayed there.

The exclamation mark design and the orange color ensure an optimal visibility. Locatable and recognizable at a distance, BSM Safety Point can be installed along seashores, docks and pontoons.

LIFE BUOY Function:

The Silzig® buoy is launched towards the person in the sea who then crosses it under his armpits to insure buoyancy. Because Silzig® is a very rugged and ergonomic buoy, a person can be hoisted up alongside a wall, contrary to traditional buoys.

- SILZIG® is located in the upper case, it is equipped with a rope of 30 meters
- Constitution of the buoy: it is a closed cell foam cylinder covered with a PVC sheath. A strap crosses the buoy over its entire length and is equipped at its ends of a carabiner in stainless steel. The buoy also includes 2 large handles for a quick and easy lifting of the person
- The instructions are shown as pictograms on the box:

1-Opening of the upper box

Pulling on a rubber grip at the foot of box.

a plastic seal reduces the risk of theft of the buoy and also ensures that the buoy is still in its box.

2- The Silzig® buoy is launched towards the person in the sea who then crosses it under his armpits to insure buoyancy

3-Tow and hoist the man overboard

Silzig® is a resistant, flexible and ergonomic buoy, a person can be hoisted up alongside a wall, contrary to traditional buoys..

DIPSPRAY Function:

The information panel allows custom view:

- The emergency call numbers to dial
- The precise positioning of the BSM Safety Point to give to rescuers reliable information of the place of the event

Characteristics of mechanical parts
